

- Know the names of a variety of common wild and garden plants
- Know the names of a variety of common trees
- Know which plants grow in the local environment
- Know the difference between deciduous and evergreen trees

Water and nutrients travel up the tree trunk, through the branches and all the way out to the leaves.

As well as looking beautiful, trees help purify the air and provide food and shelter for all sorts of creatures.

Around 2000 different types of plants are used by humans to make food.

Some trees can live for thousands of years.

Bamboo can be a fast growing plant, some types can grow almost a metre in just one day!
